## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose nor sufficiently suggest the combination of features as disclosed by applicant in the method of claim 1, apparatus of claim 29, and computer program product of claim 57, where a video program is output for presentation to a user, a notification of an incoming communications event that originates remotely from a user which includes notification portion and audio portion which is detected, with the video program being automatically paused upon detecting the receipt of the notification portion of the communications event without any action by the user, conversion the audio portion of the incoming event to corresponding text for display, and outputting a signal displaying an indication of the receipt of the notification portion of the event.

U.S. 6,553,178 to Abecassis discloses a STB which pauses displayed video and informs a user of an incoming communication, but requires user input to initiate the pause though the user picking up a telephone, resulting in the pause being initiated not by an incoming message which originates remotely from the user.

Claims 1-21, 29-49, and 57-77, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
